

We are seeking a talented individual to join our Product team at Mercer. This role will be based in Gurugram, Haryana. This is a hybrid role that has a requirement of working at least three days a week in the office.

AI | Computer Vision - Intern

Responsibilities:

- Develop and test image-processing modules.
- Develop and test classical and deep learning-based solutions for computer vision problems like image classification, segmentation, object detection, verification etc.
- Develop and deliver code for the work assigned in accordance with time, quality, and cost standards

Minimum Requirement:

- In-depth knowledge of image processing and pattern recognition techniques.
- Must have good coding experience in Python, C/C++.
- Having knowledge with the latest computer vision algorithms would be a plus

Why join our team:

- We help you be your best through professional development opportunities, interesting work and supportive leaders.
- We foster a vibrant and inclusive culture where you can work with talented colleagues to create new solutions and have impact for colleagues, clients and communities.
- Our scale enables us to provide a range of career opportunities, as well as benefits and rewards to enhance your well-being.
